OFFICIAL GOVERNMENT CONCEPT NOTE / DPP PROPOSAL

SAFE BD — National Citizen Safety Platform

Covert SOS Video Vault, Live Transit Companion & 999 Emergency CAD Integration

Date: October 2026
Classification: Government Pitch

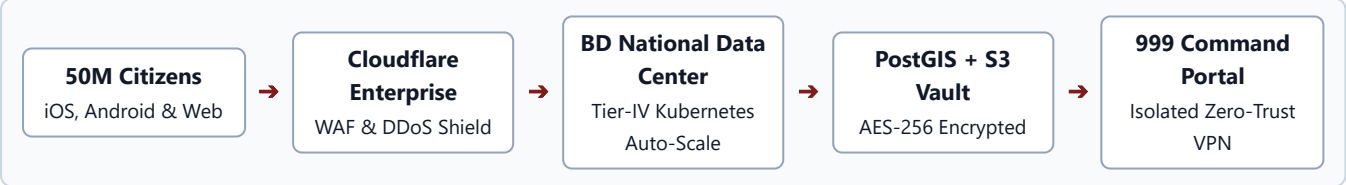

Proponent: Saad Rizwan (Founder & CEO, SAFE BD)
Partner Ministries: Ministry of Home Affairs, ICT Division (BDCCL)
Target Capacity: 10 Million – 50 Million Citizens
Operational Integration: Bangladesh Police (999 CAD) & BTRC

1. EXECUTIVE SUMMARY

SAFE BD is a sovereign national public-safety platform engineered to connect citizens in distress directly with **Bangladesh's 999 Emergency Dispatch (CAD)**. Already built and validated as a live operational prototype, SAFE BD introduces three critical life-saving capabilities:

1. **15-Second Covert SOS Video & Audio Evidence Vault:** Automatically captures and uploads encrypted MP4 video/audio evidence and live GPS coordinates the moment SOS is triggered—preserving evidence even if the victim's phone is snatched or destroyed.
2. **"Walk With Me" Live Transit Companion:** Real-time GPS route tracking for women, students, and night commuters that automatically triggers an **Overdue Distress Alert** to the Command Portal if a citizen fails to arrive on time.
3. **Moderated Civic Safety & Hazard Network:** A verified, rumor-free public safety alert feed governed by authorized administrators.

2. NATIONAL SECURITY & ZERO-CRASH ARCHITECTURE (10M–50M SCALE)

- **Zero-Crash High Availability (99.999% Uptime):** Auto-scaling Kubernetes clusters inside the **Bangladesh National Data Center (BDCCL Tier-IV, Kaliakoir)** with multi-zone failover supporting 500,000+ concurrent emergency connections.
- **Isolated Admin & Hardware Authentication:** Admin & 999 Command Portal operates on a private non-public domain behind **Zero-Trust VPN** and **FIDO2 Hardware Security Keys (YubiKey)**, audited by **BGD e-Gov CIRT**.
- **Native iOS & Android App:** Includes **Lock-Screen Power-Button SOS** (press power button 3x in pocket) and **Offline SMS Fallback** when mobile internet is unavailable.

3. REQUIRED ENGINEERING & 24/7 OPERATIONS TEAM (16 SPECIALISTS)

Role	Count	Operational Responsibility
CTO / Principal Systems Architect	1	National infrastructure architecture, security governance & 999 CAD integration
Backend & Distributed Systems Engineers	3	High-concurrency microservices, PostgreSQL/PostGIS spatial engine & WebRTC video

Role	Count	Operational Responsibility
Native Mobile Engineers (iOS & Android)	3	Native apps with lock-screen power-button SOS, background GPS & offline SMS
Frontend, GIS & DevOps / SecOps Engineers	6	999 CAD live map console, 24/7 Kubernetes auto-scaling, WAF & CIRT compliance
24/7 NOC & Moderation Officers	3	3-shift live monitoring of SOS video clips, overdue transit alerts & civic reports

4. FINANCIAL BUDGET SUMMARY (10M–50M CITIZEN SCALE)

Phase 1: One-Time National Build & Launch (CAPEX — 6 to 8 Months)	USD Estimate	BDT Estimate
Full Engineering Team & Native iOS/Android App Development (8 Months)	$140,000	৳1.68 Crore
Cybersecurity Red-Team Audit, ISO 27001 Certification & Hardware Keys	$20,000	৳24 Lakh
999 CAD Dispatch Workstations & Command Center Hardware Setup	$25,000	৳30 Lakh
Total One-Time Launch Budget (CAPEX)	**$185,000**	**৳2.22 Crore**

Phase 2: Annual Operations & Infrastructure (OPEX — Per Year)	Commercial Cost	With Govt Support
Cloud Compute & Petabyte Video Vault *(Hosted on BDCCL Tier-IV National Data Center)*	৳1.80 Crore / yr	**৳0 (National NDC)**
National SMS OTP & Emergency Alerts *(BTRC Toll-Free Public Safety Mandate)*	৳90 Lakh / yr	**৳0 (BTRC Mandate)**
Cloudflare Enterprise WAF, DDoS Protection & Enterprise GIS Maps API	৳1.10 Crore / yr	**৳1.10 Crore / yr**
Full-Time Engineering, Cybersecurity & 24/7 Operations Team Payroll	৳2.40 Crore / yr	**৳2.40 Crore / yr**
Total Annual Operating Cost (10M–50M Citizens)	**৳6.20 Crore / yr**	**৳3.50 Crore / yr (~$290k)**

5. REQUESTED GOVERNMENT CLEARANCES & DIRECTIVES

1. **Official `safebd.gov.bd` Domain & BDCCL Tier-IV Cloud Allocation** for sovereign hosting within Bangladesh.
2. **BTRC Zero-Rated Data & Toll-Free SMS Directive** across all telecom operators (GP, Robi, Banglalink, Teletalk) so citizens can trigger SOS with **0 MB mobile data balance**.
3. **API Integration Clearance** with **999 National Emergency Service** and **Porichoy NID Gateway**.
4. **Seed Grant / DPP Allocation of ৳2.22 Crore (CAPEX)** for native mobile app completion and nationwide rollout.
