SAFE bd

COMMERCIAL & KEYNOTE LAUNCH PRODUCTION STORYBOARD

Format: Apple Event Launch Style (60s TVC + 2m20s Extended Keynote)
Creative Direction: Cupertino Minimalist Cinema
Founder & Executive Producer: Saad Rizwan

Executive Production Brief: An ultra-luxurious, cinematic commercial modeled after iconic Apple product launch films (iPhone Pro Titanium, Apple Watch Ultra Emergency SOS). The aesthetic relies on pure black negative space, precision chamfered edge lighting, emotional human suspense across night-time Dhaka, and a powerful orchestral transition celebrating the life-saving technology of **SAFE bd**.

ACT I • THE PHILOSOPHICAL HOOK

0:00 – 0:18

1. The Darkness & The Question

VISUAL & CAMERA DIRECTION

Fade in from absolute OLED black (#000000). A single white beam of light grazes an unadorned surface. Minimalist typography in Apple SF Pro Display fades in with zero motion blur.

SOUND DESIGN & SCORE

Sub-bass 32Hz sine pulse. Deep atmospheric resonance. Total silence behind narrator's voice (no background hiss).

VOICE OVER (Quiet, articulate, resonant British/International baritone):
"What does it mean... to feel truly safe? Not just when everything goes to plan. But in the unpredictable, vulnerable moments of our lives."

ACT II • THE HUMAN TENSION

0:18 – 0:38

2. The Dhaka Night & The Friction

VISUAL & CAMERA DIRECTION

Cinematic anamorphic 35mm lens. Rainy reflection on Dhanmondi asphalt at 11:15 PM. Neon city reflections. A lone female student walks briskly. Footsteps echo. A father glances at his phone.

SOUND DESIGN & SCORE

Subtle heartbeat tempo begins rising. Clock ticking effect at 120 BPM. Distant city sounds fade into silence as tension mounts.

VOICE OVER:
"Because in an emergency... every single second counts. And traditional emergency response? It has too much friction. Too many menus. Too many questions."

ACT III • THE MONOLITHIC REVEAL `0:38 – 0:58`

3. Introducing SAFE bd

VISUAL & CAMERA DIRECTION
Explosive visual transition. Surgical titanium phone chassis catches rim light in slow motion. Deep crimson core pulses from the center. Clean typography: **SAFE bd. Safety. Reimagined.**

SOUND DESIGN & SCORE
Orchestral swell with punchy electronic bass hit (Apple signature drop). Crisp acoustic snap as the device locks into view.

VOICE OVER:
"Introducing SAFE bd. A national digital safety ecosystem. Designed not just to react... but to protect."

ACT IV • INNOVATION 1 `0:58 – 1:18`

4. The 300ms Lifeline (Instant SOS)

VISUAL & CAMERA DIRECTION
Extreme macro close-up of user's thumb resting on screen. One firm tap. Radiant red shockwave expands across screen. GPS latitude/longitude telemetry numbers flash in real time.

ON-SCREEN APPLE TYPOGRAPHY
300ms Dispatch • Zero-Unlocking Latency

VOICE OVER:
"One tap. In under 300 milliseconds, an encrypted distress signal fans out to trusted family circles and the national 999 emergency dispatch. With your live coordinates locked."

ACT V • INNOVATION 2 `1:18 – 1:38`

5. Walk With Me • The Virtual Escort

VISUAL & CAMERA DIRECTION
Vector satellite map smoothly zooms into street level in Dhanmondi. A luminous blue path highlights the commute. Intelligent geofencing perimeter pulses in tranquil cyan.

ON-SCREEN APPLE TYPOGRAPHY
Intelligent Transit Heartbeat • Route Anomaly Alert

VOICE OVER:
"Walk With Me. A virtual guardian that tracks your journey in real time. If you stop unexpectedly or deviate from your route, SAFE bd initiates emergency protocols before you even have to ask."

ACT VI • INNOVATION 3 `1:38 – 1:58`

6. Covert Evidence & 5TB Sovereign Vault

VISUAL & CAMERA DIRECTION
Phone screen goes totally pitch dark, yet the camera lens ring illuminates with a microscopic laser ring. Secure binary lock icon transitions into 5TB cloud vault badge.

ON-SCREEN APPLE TYPOGRAPHY
Covert Stealth Video • 5TB Sovereign Vault

VOICE OVER:
"Covert witness. Zero screen illumination. High-definition video and audio streaming directly into a private 5-terabyte encrypted sovereign cloud vault. Truth that can never be erased."

ACT VII • CLIMAX & PROMISE 1:58 – 2:20

7. A Nation Protected • Founder's Vision

VISUAL & CAMERA DIRECTION
Dawn sunlight spills across the Dhaka skyline. Interconnected safety nodes sparkle across Bangladesh. Closing frame: floating glass card with Founder Saad Rizwan's seal.

FINAL LOCKUP TYPOGRAPHY
SAFE bd • Safety • Awareness • Fast Response • Emergency Assistance
safebd.onrender.com • Web • iOS • Android

VOICE OVER:
"This isn't just an application. It is a national promise. For daughters walking home. For parents waiting. For 170 million people. This is SAFE bd."

Technical Production Guidelines for Agencies & Animators

DEPARTMENT	SPECIFICATION	TARGET BENCHMARK
Cinematography	ARRI Alexa Mini LF / Sony FX9 • Cooke Anamorphic 2x Squeeze • 90mm Macro T2.8	Apple iPhone Pro "Titanium" Reveal Aesthetic
Color Grade	Deep OLED Black (#000000), 3200K Tungsten Street Lights vs. 5600K Studio Rim	Kodak 2383 Print Emulation with Cool Titanium Rim
Sound Design	32Hz Sub-Bass Drops, Haptic Taps, 120BPM Hybrid Orchestral Cello & Synth Swell	Hans Zimmer / Labrinth / Apple Keynote Film Score
Voice Talent	Deep, authoritative baritone with quiet warmth (British/International accent)	Sir Jony Ive / Apple Event Keynote Voiceover Tone
Filming Locations	Dhanmondi Lake Walkway, Gulshan 2 Avenue, Hatirjheel Expressway at twilight	Urban Dhaka Noir $\rightarrow$ Radiant Dawn Horizon
